- As part of our ocean strategic funding, Pacific Life joined with World Wildlife Fund – UK as an initial funder of their *Blue Forests* project, with a commitment of £450,000 through 2026.
- Blue forests, otherwise referred to as blue carbon habitats, include mangroves, seagrass meadows, saltmarshes, and kelp forests.
- These habitats sequester 3-4x more carbon than terrestrial forests, yet are under a range of threats leading to over 50% loss of mangroves alone, for example, over the last 30 years.
- By 2030, the WWF-UK program aims to:
  - Protect 118 million tons of stored carbon
  - Sequester a further 2.9 million metric tons of CO2 from the atmosphere each year, and
  - Secure the wellbeing and climate resilience of 171 million people living in coastal communities
